BELL 206B II

The Bell 206B II JetRanger is a light utility helicopter introduced in 1971 by Bell Helicopter. It is powered by an Allison 250-C20B engine, providing around 420 horsepower and reaching a cruising speed of 213 km/h (115 knots).

It can carry one pilot and up to four passengers. Known for its reliability and versatility, the Bell 206B II is used for various missions, including passenger transport, search and rescue, and aerial photography.

Its range is approximately 695 km (375 nautical miles), making it a popular choice for both civilian and military applications.
